Our Reference: - "REACH" Policy Statement.

We are writing in regard to our implementation of the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) regulation (EC) No 1907/2006. As a European materials supplier Wall Colmonoy Ltd acknowledges it has responsibilities relating to this regulation, we have identified our duties as below:-

- a. Wall Colmonoy Limited (WCL) recognises our duty to ensure that all relevant raw materials supplies (metals & substances) purchased by WCL are registered with the European Chemical Agency (ECHA).
- b. Wall Colmonoy are a downstream user for all of their substances and rely on suppliers to register, where relevant.
- c. WCL metal alloy products ("special mixtures") are exempted from REACH registration as only base metals (our raw materials) require to be registered.
- d. Our raw materials are sourced, and REACH registered, from EU suppliers. The alloy products are formulated in the UK and reimported to the EU and therefore are exempt from EU REACH registration in accordance with Article 2.7c. EU REACH Registration numbers for the raw materials are provided in the Safety Data Sheets, where necessary.
- e. All other non-metal substances that WCL produces shall be internally reviewed for REACH compliance, where necessary these shall be submitted to ECHA for registration.
- f. WCL shall continually risk assess metals, alloys & substances used and communicate safety information both upstream and downstream (Customers & Suppliers)
- g. WCL shall communicate the safety information using Safety Data Sheets (SDS), and the appropriate Classification, Labelling and Packaging Regulation (CLP) signage.
- h. WCL shall continually monitor and update our SDS and our CLP signage as appropriate to any future material and legislation changes or as the result of any technical assessment carried out as required by REACH and will communicate these changes to our suppliers and/or customers.
- i. Our purchase contract terms require that all metal and substance suppliers to WCL are compliant with REACH registration requirements.
